Welcome to Engineering Onboarding!

Created by Lata Thankappan, last modified by Jill Shastany on Sep 09, 2020

Engineering Onboarding

Welcome to Akamai's Engineering Onboarding Program! Our goal is to set you up for success by equipping you with the tools you need to be an engineer at Akamai. Bookmark this page so you can easily find it again! While exploring our onboarding program, you'll see two types of pages: content (where you learn about something) and exercises (where you actually set up something). The program covers the different tools you'll need to get started at Akamai, including [SSH Keys](#), [Local Development Environment Setup](#), [Version Control](#), and learning about the [Software Development Lifecycle](#) and [Ticketing](#).
